The Packetfactory

The Packetfactory is a clearing house for cool-ass network and network security related endeavors. Here you'll find all manner of useful security tools like firewalk, network tools such as ngrep, and programming components such as libnet. Feel free to peruse and download. Everything here is free and open-sourced. If you have something you think is cool-assed enough to be hosted here, please send email to mike at infonexus dot com We are always on the lookout for exceptional new projects or papers to host here.

We're always on the lookout for the following:

- Network security tools
- Network and network security programming libraries
- Network security whitepapers and reports
- Something exceptionally cool-ass
