Portforwarding
1443
1444

IP
12.13.14.56

Firewall

Internet

LAN networks

Port 443
Host1

Port 443
Host2

Comments:
Use HTTPS - using HTTP without encryption can be sniffed
Using self-signed certificates are fine in this context
Portforwarding is possible in both firewalls, router etc. - even the smallest ones

Security   .net
